Work Experience

2007 – present

Contract Software Developer, WichitaProgrammer.com

Provide application software consulting, design, and development services to achieve positive outcomes for clients. Notable solutions include:

- Job tracking and productivity assessment software, supporting projects totaling over \$4 million in value in the first year.
- Real time credit checking and result processing for a financial services company.
- Complete redesign of an in-house billing system and billing interface, reducing data entry time by as much as 80%.
- Online surveys with dynamic, branching question flow, including survey creation and configuration by power users.
- Customized PDF delivery in a specialized environment, eliminating a planned software upgrade costing tens of thousands of dollars.

See www.WichitaProgrammer.com for details on specific projects.

1999 –2007

Application Programmer III, The Consortium, Inc

Design and code database applications, administer databases, manage other data processes. Deliver highly praised applications used across the state of Kansas. Plan and execute all steps of product development. Mentor other programmers.
